Sustainable Sandhills is a **nonprofit organization** with a focus in the eight county region surrounding Fort Bragg. This region contains the entire Sandhills Longleaf Pine Ecosystem; one of the **21 most endangered ecosystems in the nation**.

We are committed to raising awareness of not only our environment, but also our economy and **quality of life** through programs ranging from **recycling** to green business to eco-tourism.

Our leadership in these programs engages both governmental and non-governmental organizations, the military, and most importantly, **citizens** to unite our **grassroots effort** for a more Sustainable Sandhills.
