

The “Vision to Action” Tool

An interactive tool developed by the Army Corps of Engineers for EPA to help communities gain and maintain momentum and focus for the sustainable redevelopment of “Brownfield” sites.

The Corps and Sustainable Sandhills will bring the Tool to several Sandhills communities in August 2007 to encourage and support sustainable community development efforts.

“Vision to Action” 1/2-day sessions are coming to the Sandhills in August!

What is the Vision to Action Tool?

INDIVIDUAL IDEAS

become

DEDICATED ACTIONS

by individuals

COMMON THEMES

AND ACTIONS

by community leaders

An Innovative Approach to Sustainable Development

See what others want.

Rely less on consensus.

Inspire hope and
grassroots action.

Create synergy and new
partnerships.

How it works

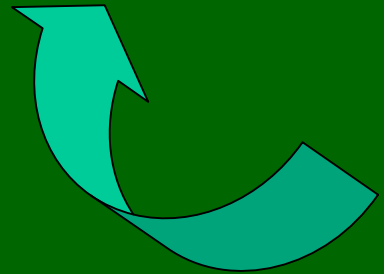

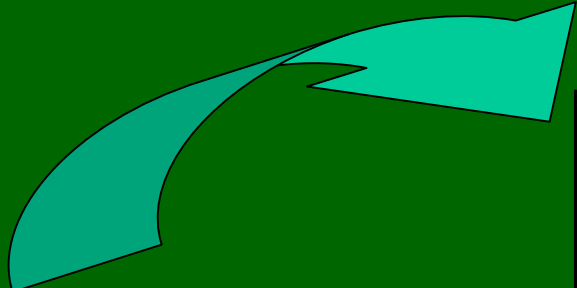

Draw your vision

Share and connect your vision to the visions of the rest of the participants.

Integrate these multiple visions into a community action plan.
